

Question 3: Is there a relationship or pattern that emerges when considering three different measurements (weight, 40yd dash time, and vertical jump) and if they differ across positions.

```
In [5]: #Create 3D scatter plot to view three different NFL Combine measurements and positions.  
import plotly.express as px  
  
fig = px.scatter_3d(df, x="Wt", y="40yd", z="Vertical", color="Pos")  
fig.show()
```
